

Public Service and Privacy Policy Evidence

Public service URL: <https://instafunnel-lphz3bum.manus.space/>

Privacy Policy URL: <https://instafunnel-lphz3bum.manus.space/privacy>

The service publishes a public Privacy Policy for Small Stories Hebrew. The policy states that the product is an internal creator tool for the channel owner, rather than a public consumer application.

The policy documents the following user-visible commitments:

1. Google OAuth is used only for the owner's authorized channel.
2. Refresh-token material is encrypted at rest.
3. Authorized YouTube API data is used only for owner-approved drafts, child-directed and synthetic-media metadata, upload-status verification, authorized performance data, and security logs without secrets.
4. Viewer profiles, comments, passwords, and Google verification codes are not collected.
5. The owner can disconnect YouTube and revoke the stored authorization.

Privacy Policy

Last updated: 26 August 2026

Small Stories Hebrew is an internal creator tool used by the channel owner to prepare and manage original, child-directed Hebrew stories on YouTube. It is not a public consumer application.

Information handled

The service handles the Google OAuth authorization needed for the owner's channel, encrypted refresh-token material, video metadata, private-upload status, and authorized YouTube performance data. It does not collect viewer profiles, comments, passwords, or Google verification codes.

How information is used

Authorized YouTube API data is used only to upload owner-approved drafts, apply child-directed and synthetic-media metadata, verify upload status, review performance data, and maintain security logs that do not contain secrets.

Storage and sharing

OAuth refresh tokens are encrypted at rest. Information is not sold or rented. It is shared only with Google and YouTube API Services as necessary to perform the authorized operation, and with the hosting and database infrastructure needed to operate the tool.

Your controls

The channel owner can disconnect YouTube at any time through the service. Disconnecting revokes the stored Google token and removes the encrypted connection record. Questions or requests can be sent to smallstorieshebrew@gmail.com.

YouTube API Services

This service uses YouTube API Services and is subject to the [YouTube Terms of Service](#) and Google's [Privacy Policy](#).
